

# Aobo Mac OS X Keylogger Faqs: Trouble running Aobo Mac Keylogger Trial Version?

Hello, I recently downloaded the trial version of the Keylogger program for Mac computers. However, I haven't been able to run it since the Setting Menu does not pop up after entering the hotkey. Would you be so kind as to provide me with some advice on how to run and try this program?

Thank you very much

-----

Hi,

Please make sure the following steps.

1. You have rebooted your Mac after installation
2. Run the keylogger after rebooting again if you didn't see the settings menu before rebooting.
3. Use the hotkey (Find it in the Readme file from your downloaded package) to call out the settings menu then
