

# Aobo Mac OS X Keylogger Faqs: Will this keylogger work with multiple user logins on my mac? (mine, my son's, my daughter's, etc etc) Also, once this is installed, can people using the computer find it easily?

Yes, you can install the keylogger for multiple users.

1. Install it in your main user account. Configure the keylogger.
2. Login to other user accounts and run the keylogger
3. Configure the keylogger one by one on each account .

Unique solution ID: #1039
