

Aobo Mac OS X Keylogger Faqs: How to install Aobo Mac Keylogger on multiple user accounts in one Apple Mac

Maybe you have a shared apple Mac computer which has multiple user accounts. For example, you have the admin user account while your kids can only logon to the limited user account with parental control.

Sometimes you need to install the keylogger on multiple accounts. The instructions below will show you how to do that.

Aobo Mac keylogger is very easy to use. The installation steps are just copy and paste actions.

To install Aobo Mac keylogger on another user account, please follow the below steps:

1. Log in to the user account you want to install the keylogger in.
2. Copy Aobo Mac Keylogger to a secret folder in your disk.
3. Double click it to run Aobo keylogger.
4. Open it with the default hotkey.
5. Configure the mac keylogger according [installation guide](#).
